👤 OVERVIEW

A proactive NOC Engineer with hands-on experience in 24/7 network monitoring, currently transitioning into Cloud, DevOps and System Engineering. Committed to mastering multi-cloud infrastructure (AWS & Azure) and system automation to enhance operational efficiency and infrastructure reliability.

🎓 EDUCATION

Information Technology IT
Government Technical Institute (G.T.I)

Maths (3rd yr)
Dagon University

🧰 EXPERIENCE

BIM Advanced Technology Services (BIM-ATS)

05/2025 – Present

NOC Engineer

- Proactive Monitoring: Managed 24/7 real-time monitoring of system performance and network stability using industry-standard tools like Datadog and Zabbix to ensure high availability.
- Incident Management: Actively identified and responded to critical alerts, coordinating rapid incident resolution to minimize downtime and maintain seamless business operations.
- Cloud Health Oversight: Leveraged AWS CloudWatch to monitor cloud infrastructure resources and application health, ensuring optimal performance across cloud environments.
- Analysis & Reporting: Tracked detailed incident timelines and analyzed downtime logs to provide actionable insights for future troubleshooting and system improvements.
- Stakeholder Coordination: Professionalized external communications by managing timely email notifications to partners regarding planned maintenance and technical incidents.

Freelance Dev

Present

Frontend Web Developer (AI-Augmented)

- Designed and delivered responsive, user-centric frontend web solutions, prioritizing intuitive UI/UX and seamless functionality to meet diverse client requirements.
- Leveraged advanced agentic AI development tools (Claude, Kimi, Base44) to streamline the frontend development lifecycle, generating, customizing, and refining production-grade code (HTML, CSS, JavaScript, React) with high accuracy and speed.
- Conducted thorough code reviews, debugging, and system integration of AI-generated outputs, ensuring clean architecture, cross-browser compatibility, and optimal load performance.
- Architected and deployed static and dynamic web services on cloud infrastructures (AWS S3/CloudFront and Azure Static Web Apps), utilizing AWS CloudWatch to proactively monitor application health, uptime, and resource efficiency.

Local NGO

IT Support Volunteer

- Performed system deployments, including Windows OS installation, software configuration, and routine updates.
- Provided essential IT technical support to staff in the field and office environments.
- Diagnosed and resolved hardware, software, and basic networking issues.
